List of papers published by "Prof. Mehdi DEHGHAN" in ISI journals (updated 16 December 2021 = 25 Azar 1400). All papers are published free of any charge.

Mehdi DEHGHAN, Professor of Department of Applied Mathematics, Faculty of Mathematics and Computer Sciences, Amirkabir University of Technology(Tehran Polytechnic), No.424 Hafez Av. Tehran, IRAN(Islamic Republic of Iran) E-mail: mdehghan@aut.ac.ir; Second e-mail(Non–University Email Account): mdehghan.aut@gmail.com

4-Mostafa ABBASZADEH and Mehdi DEHGHAN, Meshless local numerical procedure based on interpolating moving least squares approximation and exponential time differencing fourth–order Runge–Kutta (ETDRK4) for solving parabolic interface problems, Engineering with Computers, in Press (2020), DOI: 10.1007/s00366-020-01057-0 .

8-Ali EBRAHIMIJAHAN and Mehdi DEHGHAN and Mostafa ABBASZADEH, Simulation of plane elastostatic equations of anisotropic functionally graded materials by integrated radial basis function based on finite difference approach, Engineering Analysis with Boundary Elements, Volume 134, (2022) Pages 553–570 .
9-Mehdi DEHGHAN and Akbar SHIRILORD, Three-step iterative methods for numerical solution of systems of nonlinear equations, Engineering with Computers, in Press (July 2020), doi.org/10.1007/s00366-020-01072-1

18-Gh KARAMALI and Akbar SHIRILRD and Mehdi DEHGHAN, On the CRI method for solving Sylvester equation with complex symmetric semi-definite positive-coefficient matrices, FILOMAT, accepted (20 September 2021).

21-Akbar SHIRILORD and Reza KARAMALI and Mehdi DEHGHAN, Solving Sylvester equation with complex symmetric semi-definite positive coefficient matrices, *FILOMAT*, Accepted 5 December 2021.

20-Mostafa ABBASZADEH and Mehdi DEHGHAN, The proper orthogonal

30-Mohammad Ivan AZIS and Mostafa ABBASZADEH and Mehdi DEHGHAN and Imam SOLEKHUDIN, A boundary–only integral equation method for parabolic problems of another class of anisotropic functionally graded materials, Materials Today Communications, Volume 26, (March 2021), Article 101956.

3-Mehdi DEHGHAN and Niusha NARIMANI, Radial basis function-generated finite difference scheme for simulating the brain cancer growth model under radiotherapy in two various types of computational domain, Computer Methods and Programs in Biomedicine, volume 195 (2020) 105641.

5-Mostafa ABBASZADEH and Mehdi DEHGHAN, Simulation flows with multiple phases and components via the radial basis functions-finite difference (RBF–FD) procedure: Shan–Chen model, Engineering Analysis with Boundary Elements, volume 119 (2020) pages 151-161.

6- Vahid MOHAMMADI and Mehdi DEHGHAN, Generalized moving least squares approximation for the solution of local and non-local models of cancer cell invasion of tissue under the effect of adhesion in one-and two-dimensional spaces, Computers in Biology and Medicine, Volume 124 (2020), Article 103803 (It is 20 pages).

12-Mostafa ABBASZADEH and Mehdi DEHGHAN, Direct meshless local Petrov–Galerkin method to investigate anisotropic potential and plane elastostatic equations of anisotropic functionally graded materials problems, Engineering Analysis with Boundary Elements, volume 118 (2020) 188-201.

20-Mohammad SHIRZADI and Mehdi DEHGHAN and Ali Foroush BASTANI, On the pricing of multi–asset options under jump–diffusion processes using mesh-

10- Mehdi Dehghan and Mostafa Abbaszadeh, The simulation of some chemotactic bacteria patterns in liquid medium which arises in tumor growth with blow–up

20-Mostafa ABBASZADEH and Mehdi DEHGHAN, Numerical and analytical investigations for neutral delay fractional damped diffusion-wave equation based on the stabilized interpolating element free Galerkin (IEFG) method, Applied Numerical

30-Mostafa ABBASZADEH and Mehdi DEHGHAN, A reduced order finite dif-

22-M. Dehghan, M. Abbaszadeh, Variational multiscale element–free Galerkin method combined with the moving Kriging interpolation for solving some partial differ-

23- M. Dehghan, R. Mohammadi–Arani, Generalized product–type methods based on Bi–conjugate gradient(GPBiCG) for solving shifted linear systems, *Computational*

11-M. Dehghan, M. Abbaszadeh, A. Mohebbi, Legendre spectral element method

29- **M. Dehghani-Madiseh, M. Dehghan**, Generalized solution sets of the interval generalized Sylvester matrix equation $\sum_{i=1}^{p} A_i X_i + \sum_{j=1}^{q} Y_j B_j = C$ and some approaches for inner and outer estimations, *Computers and Mathematics with Applications*, Volume 68(12), (2014) Pages 1758–1774.

22-S. Aryanmehr, M. Dehghan, M. R. Eslahchi, The weighted \((0, 1, ..., m – 2, m)\)–interpolation technique based on the roots of the classical orthogonal polynomials.

26- M. Dehghan, M. Hajarian, Solving the generalized Sylvester matrix equation \( \sum_{i=1}^{p} A_i X B_i + \sum_{j=1}^{q} C_j Y D_j = E \) over reflexive and anti–reflexive matrices, International Journal of Control, Automation and Systems, Volume 9(1), (2011), Pages 118–124.

46-M. Dehghan, R. Mazrooei–Sebdani, H. Sedaghat, Global behaviour of the
