

**Department:** Mathematics and Computer Sciences  
**Division:** Computer Sciences and Statistics  
**Level and Major:** Graduate

**Course Title:** Introduction to Data Mining

**Number of Credits:** 3

**Prerequisite:** -

**Lecturer:**

**Course Description:** Review and Analyze Data and introduce different methods for Clustering them:

- Preprocessing Data (Filters, Missing Values)
- Data Mining
- Decision Trees
- Classification / Regression Algorithms (J48/C5.0, M5P)
- Presentation Skills to non-technical Audience
- Normalization, Distance, Correlation
- Machine Learning
- Compare Items (k-NN/IBk)
- Predictive Revenue Model (k-NN, M5P...)
- Class Prediction Model (J48, k-NN)

**Course Topics:**

- Chapter 1. Introduction
- Chapter 2. Know Your Data
- Chapter 3. Data Preprocessing
- Chapter 4. Data Warehousing and On-Line Analytical Processing
- Chapter 5. Data Cube Technology
- Chapter 6. Mining Frequent Patterns, Associations and Correlations: Basic Concepts and Methods
- Chapter 7. Advanced Frequent Pattern Mining
- Chapter 8. Classification: Basic Concepts
- Chapter 9. Classification: Advanced Methods
- Chapter 10. Cluster Analysis: Basic Concepts and Methods
- Chapter 11. Cluster Analysis: Advanced Methods
- Chapter 12. Outlier Detection
- Chapter 13. Trends and Research Frontiers in Data Mining
- Working with Rapid Miner or Clementine

**Reading Resources:**
